

Recommendation letter

Admission board of the Turkiye Scholarships Burslari,

I am Bassem Wsifi responsible for production at 3D wave company, I'm writing to express my wholehearted support for Zied's application to study Master Degree within The Turkiye Scholarships Burslari program. As Zied's supervisor during his senior internship with 3D wave company in the period from 2/01/2018 to 5/28/2018, I met with him frequently to assign responsibilities and discuss some idea in order to develop our activities. I was impressed with Zied's communication skills, initiative, and ability to meet deadlines. He became a valued member of the team, and I'm confident that he has a successful career ahead of him.

As an intern in our Company, Zied had a number of responsibilities. He worked with members of our team on various projects, including CAD design, 3D printing and augmented reality applications. Zied was especially skilled at generating reports and maintaining the 5s process on the office, it is clear that Zied has a passion for the new technologies as usually he introduces us to new ways to do things.

Beyond his mentioned skills, Zied left a mark with his open, thoughtful personality. He is well-spoken and intellectual, and he lights up when talking about ideas. A company like 3D wave is exactly where Zied belongs but he made his choice to pursue his hunger for knowledge. Zied's charming personality and language skills will be another bone to his success.

In closing, I'd like to reiterate my strong support for Zied's application to study a Master degree within your Program. He is a talented young man driven by a passion for science. Please don't hesitate to contact me for any further information. Thank you for your time.

Sincerely,

Bassem Wsifi

Responsible for production

3D Wave Company
